

## NOTIFICATION REGARDING PATENTS

Dear President of the European Patent Office:

By this means Mário Vicente, bearer of the Portuguese civilian identification 11452852, informs you and the Office that there were made public the characteristics of a new machine learning system which is described and demonstrated in the web address [1] and whose presentation is also attached to this message.

For this reason it is requested that the European Patent Office from now on **rejects** in full or in part any and all patent proposals with the characteristics and purpose thereby objectively described.

Moreover, I inform your excellency that the need and importance of this action roots on the impact for society that would come from the intellectual, industrial or any other kind of property, of the technology that will allow the creation of systems with intelligence matching the human's. Any system with said characteristics will have to rely, totally or partially, in the process that hereby I present to you.

By this means will society be able to be ahead of unregulated and unaudited private initiative, thus mitigating the consequences that the traditional technology and the misinformation and disinformation in artificial intelligence have until this day plagued the business, the industry, the consumers and society at large.

This communication is made electronically and will also be directed to the United States Patent and Trademark Office and to the Portuguese Institute for Industrial Property.

Lisbon, August 8th 2023
